Monthly Sales & Profit Performance

- Sales and profit stayed fairly consistent across most years.
- January, February and December were the strongest months, bringing in the highest sales and profit.
- April was the weakest month, recording the lowest sales and profit before performance recovered in the following months.

Over 50% of Profit Comes From the USA

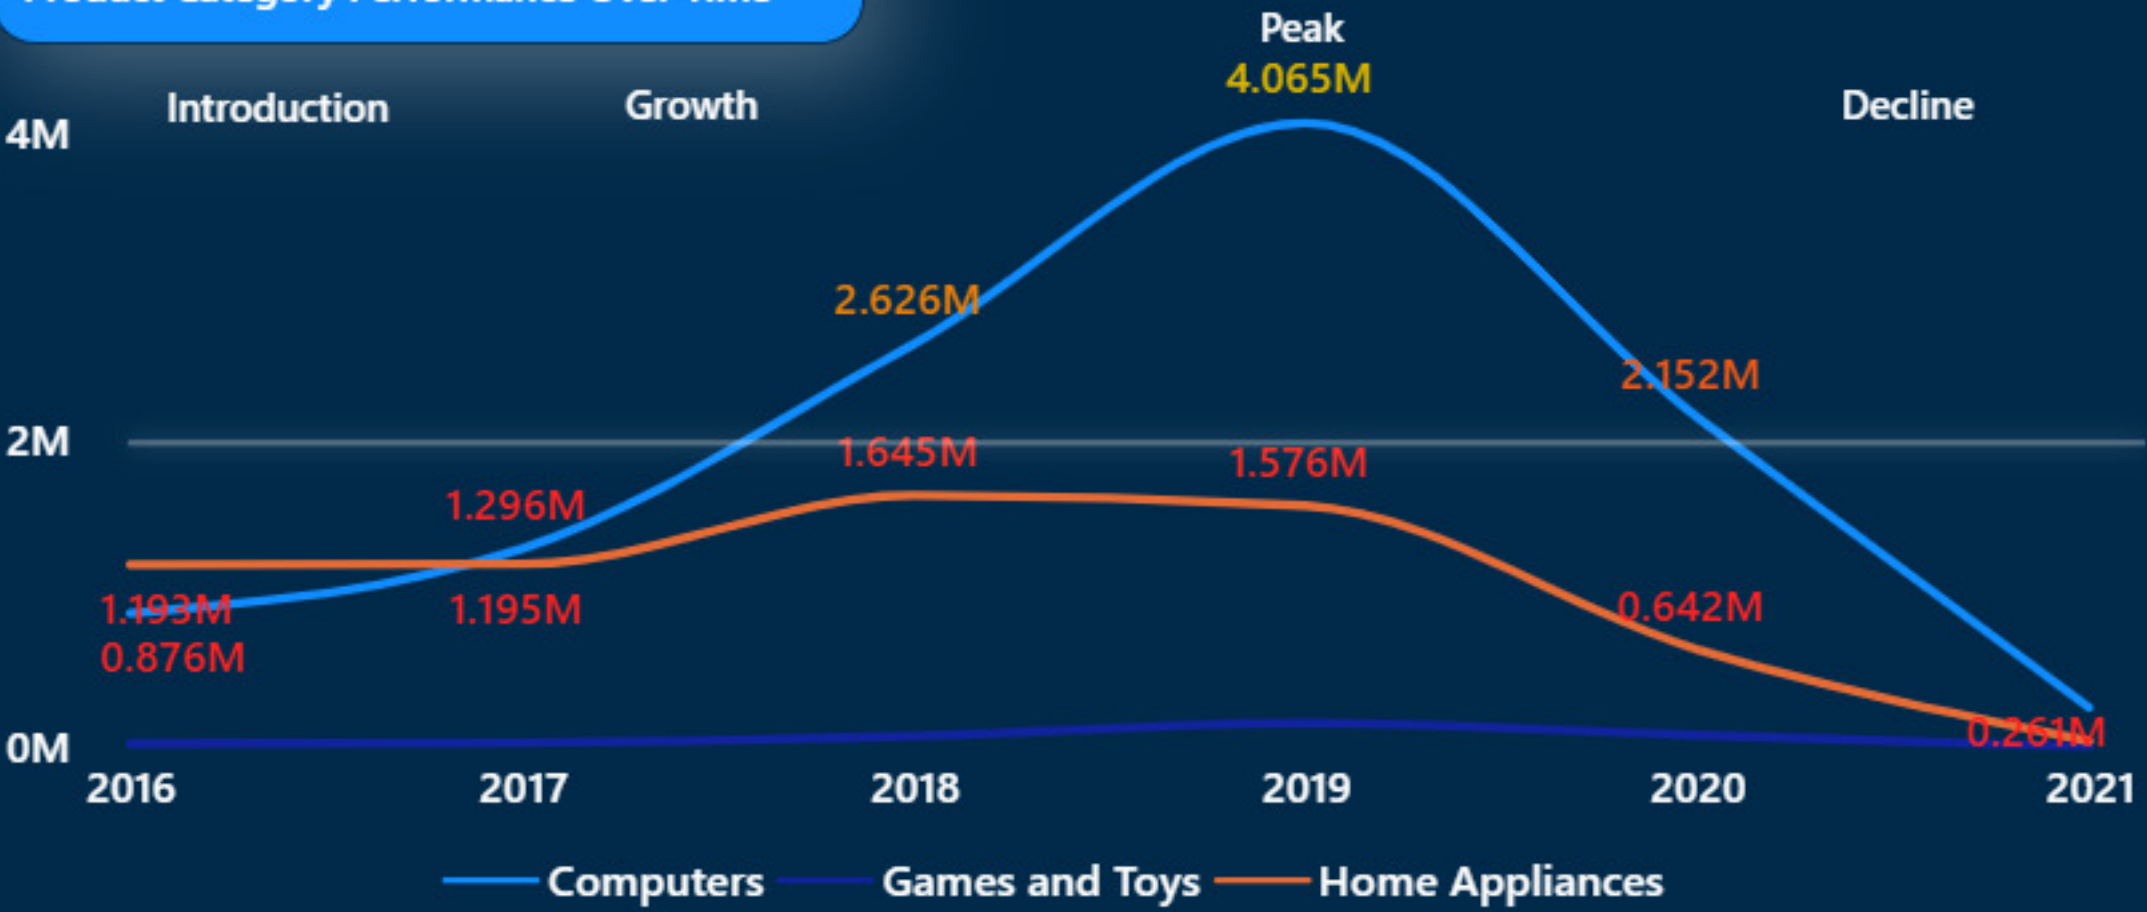

- USA is the profit driver making it the backbone of the business. Any change in performance would have significant impact on overall business results
- Revenue drops sharply after the USA, showing that growth is not evenly distributed across markets.
- The business has opportunities to reduce dependence on a single country by expanding performance in other regions.

Product Category Performance Over Time

- Computers became the leading profit category in 2017, while most categories continued growing and reached their peak in 2019
- Games & Toys failed to generate meaningful profit throughout the period, raising questions about its long-term value to the business.

Which product categories are maximizing our profitability ceiling?

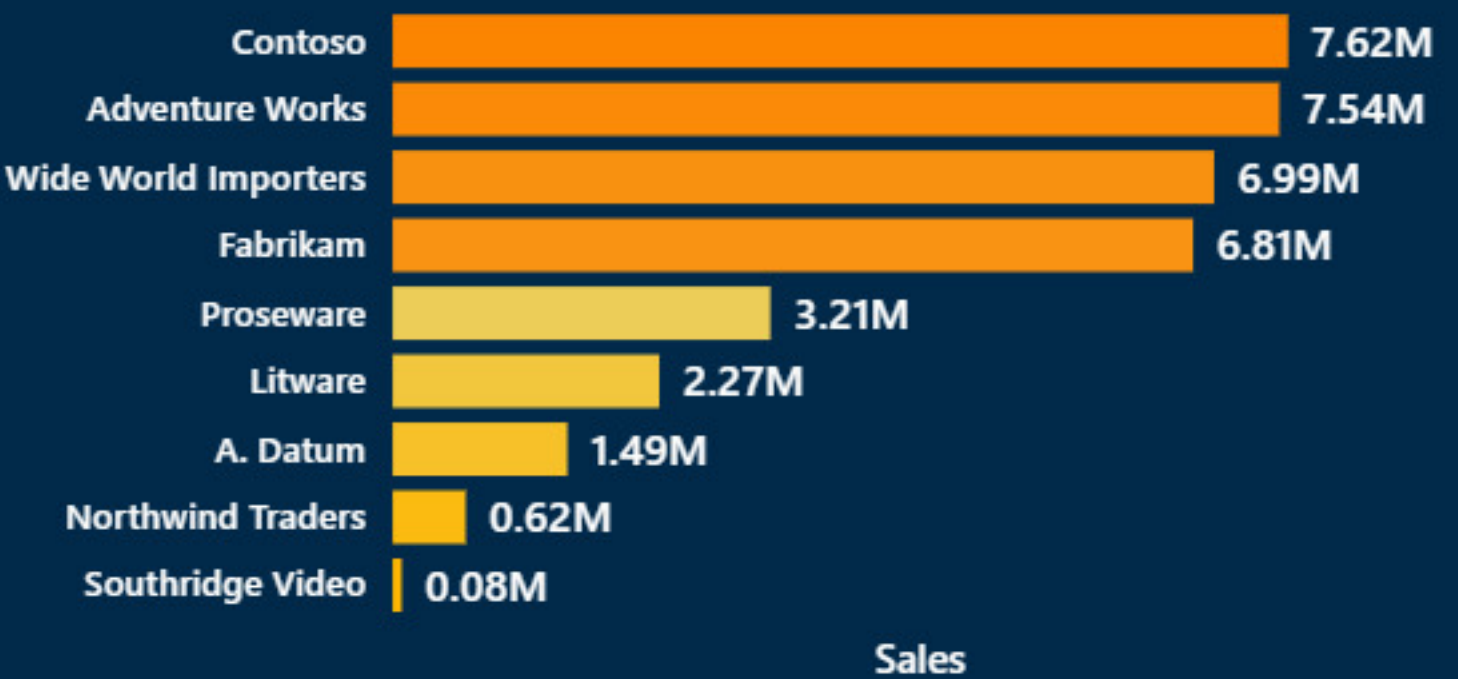

Overview

Detailed

- Similar margins indicate that profit is driven mainly by sales volume.
- A small group of brands contributes a large share of product profits.
- Brand leadership differs across product categories, showing specialized strengths.

How is sales volume distributed across our brand portfolio?

Global Electronics Sales Performance

category	2017	2018	2019	2020	2021
Audio	39.53%	69.76%	32.87%	-57.38%	-82.73%
